

N Quincy St and 5th Rd N

BEFORE TREATMENT

Safety Issue: Missing link in Quincy St protected bike lane.

Treatment: Staff completed the Quincy St protected bike lane segment between Wilson Blvd and N Glebe Rd in coordination with the Mosaic Park project. There was previously a curb extension at the intersection of 5th Rd N, which required northbound bikes to maneuver around the curb. The Mosaic Park upgrade included sidewalk upgrades and removed the curb extension. Staff then created continuity in the protected bike lane through this intersection and added green bike lane markings across the intersection to increase visibility of people on bikes in this segment.

Completed: May 2021
