**RE: Revised Special GLUP Study Request**

Dear Ms. Cozart:

This firm represents Vornado/Charles E. Smith (the “Applicant”). Please accept this letter as an addendum to the request letter provided on behalf of the Applicant on June 12, 2015 (the “Original Letter”). Since the submittal of the Original Letter, some additional information has been provided that the Applicant desires to add to its proposal.

A number of community members have requested that the Applicant consider the feasibility of locating a new South Arlington elementary school at the project site. In accordance with this request, the Applicant has undertaken a review of the site and identified two locations (a front site and a rear site) that could potentially be suitable for a new elementary school. Attached hereto as Exhibit A is a potential test fit for an elementary school at these locations.

It should be noted that, although the Applicant is open to the possibility of inclusion of a school at the project site, this is an option that may or not be included in the Applicant’s final proposal. Regardless, it is important that the option be considered during the review of the Applicant’s proposal, particularly in light of the interest that has been shown by the community. The Applicant’s proposal continues to include an affordable housing building, which may be located at either the front site (as initially proposed) or the rear site if it is determined that an elementary school should be located at the front site.

After you have had the opportunity to review this information, please do not hesitate to contact me with any questions.

Sincerely,

Kedrick N. Whitmore
