County Board	November 17 th or 27 th <i>(draft staff report posted 11/9)</i>

MTP Streets Element (2006)

Policy 13(11) – Enhance Arlington’s natural environment through improvements to the street tree canopy by planting trees in landscape strips and medians and by creating planting areas where they do not currently exist.

Implementation Actions

a. Plant trees as part of street improvement projects, and initiate landscaping projects on locally and state-owned roadways where trees can be accommodated without negatively affecting safety

Urban Forestry Master Plan

Objective: Ensure that tree planting and preservation are important elements of our streetscapes.

21) Create more opportunities for tree planting in the public ROW such as; tree nubs; street narrowing; larger planting strips; curb, gutter and sidewalk design and material innovations.

22) Optimize communication between County departments and divisions so that redeveloped County ROW is planted as soon as possible.

23) Work with streetscape designers and planners to ensure tree species diversity.

24) Implement a street tree planting plan (see Appendix II).
