

Resurfacing Projects for Complete Streets

What types of improvements can be made through street maintenance?

After

Fort Myer Drive at Fairfax Drive

Before

Safer Streets for All

- Shorten crossings for people walking through **curb bump outs, medians** or **median extensions** and **bike lanes**
- Increase clarity by **formalizing travel lanes** and adding **high visibility markings** and **advance signage**
- Provide more separation between people driving and people biking through **buffered or protected bike lanes**
- Reduce vehicle speeds with **pavement markings**, including bike lanes or medians, **curb bump outs, medians** and **signage**.
- Better sight lines and more controlled vehicle turning movements through **curb bump outs** and **pedestrian islands**

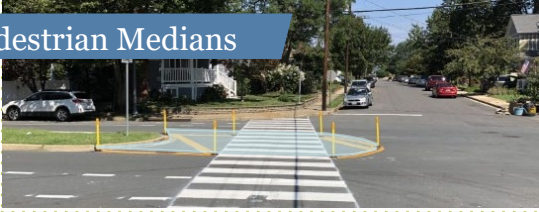

Resurfacing Projects for Complete Streets

Example Improvements Include:

Pedestrian Bump Outs

Pedestrian Medians

Buffered or Protected Bike Lanes

Improved Traffic Controls

Improve pedestrian crossings

Provide separation between people driving, walking and biking
