REQUEST FOR DEMOLITION OR REMOVAL OF BUILDING

WATER /SEWER ENGINEERING AND UTILITIES SERVICES OFFICE

Site Information

Address of Building: __________________________________________________________
Name of Owner: _____________________________________________________________
Applicant Name: _____________________________________________________________
Phone (s): _________________________________ Date:  ___________________________

Disclaimer

The following conditions must be met or agreed upon by the Water/Sewer Engineering Section and the Utilities Services Office of the Department of Environmental Services (DES) prior to approval of this demolition request.

1. The water and sewer account must be closed and the final bill must be paid prior to issuing the demolition permit.

2. The existing sewer lateral must be capped at the property line by the Owner and inspected by the Inspections Services Division prior to issuing the demolition permit. If during inspection, it is determined that they lateral cannot be used, then the lateral must be capped at the sewer main, and a new sewer lateral is required. For inspection of capped service lateral call 703-228-3800.

3. Per County Code 26-8, the issuance of a demolition permit shall constitute an implied request by and permission from the property Owner for discontinuance of the water service connection.

4. As a courtesy, temporary use of the water service connection will be allowed for construction purposes only. In order to do this you will need to request a temporary construction account from the Utility Services Office.

Is temporary retention of existing water service requested by applicant for construction purposes?  

☐ YES  ☐ NO

The temporary service for construction purposes will be automatically disconnected upon installation of the new, permanent water service for the property. DES requires that all new construction must pay for a new water service prior to the connection of the new water service line.

5. If the land disturbed exceeds 2500 square feet, or if any of the area is in the Chesapeake Bay Resources Protection Area (RPA), then the applicant must comply with the Chesapeake Bay Preservation Ordinance (revised and effective February 8, 2003) and apply for a Land Disturbance Activity Permit (LDA Permit). Application for an LDA Permit requires an Existing Conditions Plan, Demolition and Grading Plan, Erosion and Sediment Control/Storm Water Management Plan, and a Conservation Plan. Four (4) sets of these plans are required.

Signature of Owner or Authorized Agent                                                                   Date

Letter From Utility Requirement

1. Have your service address and account number ready. These are needed for the discontinuation of water service. Please note, only an owner or authorized agent of the owner can request discontinuation of service.

2. Submit payment to the Treasury Department. The various payment options are available at: https://capp.arlingtonva.us. It can take up to 3 days for your payment to be applied to your utility account. Please leave adequate time for this step to occur. To expedite this step, you can send a copy of a receipt or other electronic proof of payment to UBPROOF@Arlingtonva.us and we can apply the final amount to your account within 1 business day.

3. Request to retain the existing water service for construction purposes. If you plan on using water for construction purposes, a new water-only account must be requested and established after the existing account is finalized. This temporary service will be disconnected when the new water service is installed.

Note: It may take up to 7 business days for a read and a calculation of the amount outstanding on your account to occur. Please allow adequate time for this process to occur.

Note: Utility billing demo permits are processed by the DES Customer Contact Center. You can initiate this process by calling the Contact Center at 703-228-5000.
The following service connections and appurtenant equipment, such as meters and regulators, have been removed or sealed and plugged in a safe manner.

Electric Service
Dominion Electric Power Company
