The proposal includes demolishing the existing 82 garden style apartments and constructing 300 units across four buildings. All 300 units will be affordable (17 up to 30% AMI, 70 up to 50% AMI and 213 up to 60% AMI). The project requires a Tenant Relocation Plan.	300	Project will be 100% affordable	TBD

Plan/Study	Description	Housing Commission and County Board Meetings
Columbia Pike Neighborhoods Form Based Code (N-FBC) Transfer of Development Rights (TDR) Multipliers for Conservation Area Properties	The N-FBC Conservation Areas are solely comprised of portions of Barcroft and Fillmore Gardens apartment complexes (sending sites). TDR is a tool that could help preserve the affordability of the units within these areas. To facilitate the transfer, the County Board adopted a multiplier that allows density eligible to transfer to a receiving site on Columbia Pike to equal 3 times the specified number of committed affordable housing units preserved at the Conservation Area sending site. If the receiving site is located elsewhere in the County, then 2 times the specified number of committed affordable housing units preserved at the Conservation Area sending site could be transferred. The multipliers sunset on December 31, 2020. Staff recommends reinstating the multipliers to keep TDR as an available option for affordable housing preservation at the Barcroft and Fillmore Gardens properties.	January (Information) March (Action)
Housing Conservation Districts (HCDs)	<p>The HCD was established by the County Board in December 2017 to preserve affordable housing resources in areas of the County with market rate affordable housing. An update report was published in May of 2019 containing analysis and preliminary recommendations.</p> <p>As part of the planning work related to the Housing Conservation District (HCD), staff is examining the bonus density and height provisions for Article 6 Multiple-Family (RA) districts comprehensively (both within the HCD and more broadly) following the adoption of a zoning amendment related to bonus density in November 2019. The anticipated Multi-family Reinvestment Policy/Zoning Tool is a refined approach to implement adopted HCD policy goals while also modernizing standards for other areas of Arlington County planned and zoned for multi-family housing not identified in previous steps in the HCD study. This new approach would streamline standards to provide guidance for multifamily development in RA districts, based on newly established, common expectations for density, building placement, affordability, parking, housing diversity, and height.</p>	CB Approved Policy Framework, GLUP Amendments, AHMP Amendments
Plan Lee Highway	<p>The purpose of the study is to develop a comprehensive vision and policy framework for the future of this important corridor and its surrounding areas. Since the last in person gathering, during the Jan. 31-Feb. 1 Plan Lee Highway Community Workshop, two reports have been developed that shed further light on both the background and current life of Lee Highway neighborhoods:</p> <ul style="list-style-type: none"> - Historic and Cultural Resources Report: research, documentation and survey of historic and cultural resources (i.e. significant buildings, events, places, people and stories) in the planning area. - Neighborhood Inspiration – A Guide for Developing Future Plans: highlights of conditions and attributes of different neighborhoods along Lee Highway. 	TBD
Missing Middle Housing Study	A research compendium of existing conditions related to the Missing Middle Housing Study was released over the summer in a series of five bulletins. The County Board held a work session on September to review the findings of the research compendium and to review a revised scope of work. Revisions to scope of work were based on feedback received from County commissions and other community groups. The Board directed staff to proceed with the study as outlined in the scope of work. The kickoff event for the Study occurred October 28.	TBD
